This product conforms to UL Standard 507.

**⚠ WARNINGS**

- w.1 - To reduce the risk of fire, electrical shock, or personal injury, mount fan directly from building structure and/or an outlet box marked acceptable for fan support of 70 lbs (31.8 kg) and use the mounting screws provided with the outlet box.
- w.2 - To avoid possible electrical shock, before installing or servicing your fan, disconnect the power by turning off the circuit breakers to the outlet box and associated wall switch location. If you cannot lock the circuit breakers in the off position, securely fasten a prominent warning device, such as a tag, to the service panel.
- w.3 - To reduce the risk of fire, electrical shock, or motor damage, use only Hunter Solid State Speed Controls.
- w.4 - To reduce the risk of personal injury, do not bend the blade brackets when installing the blade brackets, balancing the blades, or cleaning the fan. Do not insert foreign objects in between rotating fan blades.

**⚠ CAUTIONS**

- c.1 - All wiring must be in accordance with national and local electrical codes ANSI/NFPA 70. If you are unfamiliar with wiring, use a qualified electrician.

Ceiling Bracket

Make sure all four (4) bumpers are still attached.

**Use wood screws** (included) when securing to support structure with approved electrical outlet box. Drill 9/64" pilot holes in support structure to aid in securing ceiling bracket with hardware found in the ★ hardware bag.

**Use machine screws** (provided with outlet box) when securing to existing ceiling fan-rated outlet box. Make sure it is securely installed and is acceptable for fan support of 31.8 kg (70 lbs) or less.

To avoid possible electrical shock, before installing your fan, disconnect the power by turning off the circuit breakers to the outlet box associated with the wall switch location.

Refer to warning w.1 on pg. 2

Hanging the Fan

While holding the wires out of the way, lift the motor assembly and place the square hanger into the opening in the ceiling bracket. Be sure the ground wire attached to the hanger faces out of the large opening in the ceiling bracket.

⊗ Once the motor is in the ceiling bracket, use the two locking screws found in the ★ hardware bag to secure the motor to the ceiling bracket.

**Note:** Fan style may vary.

Using an orange wire connector from the ★ hardware bag, connect the 3 grounding wires (green, green/yellow stripe, or bare copper) coming from the ceiling, downrod, and hanging bracket.

**FROM CEILING**

**FROM FAN**

Refer to CAUTION c.1 on pg. 2

Motor Housing

Raise the motor housing up over the motor and ceiling bracket. Turn the motor housing so the screw holes align and the indentation in the housing locks into place with the notch in the ceiling bracket. **The motor housing is not secured until the next step is complete. Do not leave unattended.**

⊗ With a Phillips head screwdriver, install the four motor housing screws found in the ● hardware bag. Tighten all four screws securely.

- ⊗ Insert grommets found in the ■ hardware bag into the holes in the blades, then secure each blade to a blade iron with screws found in the ▲ hardware bag.

- ⊗ Lightly attach the blade irons to the motor with screws found in the ☒ hardware bag, then securely tighten after both screws are attached.

Your blades are shielded with Dust Armor® which is a nanotechnology coating that repels dust. For cleaning the fan, use soft brushes or cloths to prevent scratching. Cleaning agents may damage the finishes.

## Switch Housing

- ⊗ Screw two (2) housing assembly screws from the ≡ hardware bag halfway into the motor housing. It does not matter which two screw holes you choose.

- Feed the wire plug through the center hole of the upper switch housing, then wrap keyhole slots around the screws and twist counterclockwise.

- ⊗ Insert the third screw, found in the ≡ hardware bag, into place and then tighten all three (3) screws.

Make sure the upper switch housing is securely attached to the mounting plate. Failure to properly secure all three assembly screws could result in the switch housing fixture falling.

⊗ Partially install two of the switch housing screws found in the bag. Connect the plugs from the upper and lower switch housings. Make sure to line up the colored markings on the plug connectors.

Align the notches in the sides of the lower switch housing with the screws on the upper switch housing. Twist the lower switch housing clockwise to lock into place. Install the third switch housing screw. Tighten all three screws securely.

Connect the fan pull chain pendant to the short chain coming from the switch housing.
